Seeking a software engineering position where I can utilize my strong programming skills, analytical aptitude, and commitment to excellence to develop reliable, user friendly software applications. Analyze the logic and transactions of any business flows to create new innovations of technology that we use to improve the efficiency of software in daily business transactions.

EXPERIENCE IN SOFTWARE DEVELOPMENT

Zone and Co – March 2022 to Present

Role: Netsuite Developer

I've been working on developing a SuiteApp that automates the billing process for any transaction. The core idea is simple: our SuiteApp takes a PDF-generated transaction and automatically creates a bill for the customer. To make this happen, we use third-party OCR software to extract all the necessary data from the provided PDF and seamlessly convert it into a bill.

Beyond that, we also support E-Invoicing for NetSuite-to-NetSuite transactions. When one NetSuite customer sends a transaction, we trigger the process of converting it into JSON data and sending it to a third-party service. On the receiving end, another NetSuite customer gets that data, and our system automatically creates a bill from it.

In addition to these features, we also handle customer-specific customization requests, implementing scripts or solutions based on their needs.

I've also worked with our Bank Reconciliation SuiteApp, where I've handled customer-reported issues and helped troubleshoot and resolve them.

Oracle Netsuite – Jan 2019 to March 2022

Role: Platform Software Eng. II

Develop a bundle that would support the Tax of all Netsuite customers in different countries.

Netsuite Key skills

- Customization(Custom Record, Fields, etc.)
- SuiteScript 2.0(Suitelet, Scheduled, UserEvent, Client, etc.)
- Saved Search
- Suite Bundler
- SDF
- SuiteQL (SQL 92)
- Git
- Clean Architecture
- Performance
- Migration
- Role Permission
- Multi-book Accounting
- Tax Reports
- Relationships(Customer, Vendor, Leads, etc)
- Custom CSS - Applied in different features to modify the default NS design
- License feature - Intended for the customer license of our SuiteApp
- Unit-Test using Jest
- Creating of Test Plan for every feature implementation
- Server-Sent Event, Polling - Streaming some data
- React JS, Redux, Material UI, Semantic UI - Implemented some features to create our own page design within Netsuite

Medilink Network Inc. – June 2017 to Jan 2019

Role: Software Engineer

In the healthcare industry, I'm a Core Open Source Developer.

Develop 5 different websites and REST API for mobile development used in healthcare and hospitals for billing transactions.

OTHER SKILLS

Feature Implementation Strategies, Engineering Notes, Integration, Migration, API, SSO, Serverside and Clientside programming, OOP and Functional programming, Unit and Functional Testing, Feature performance details gathering and improvements. User authentication (Token, Cookie, UUID), Security Code, MVC, Agile (Sprint planning, Spike, Feature Refinement, Scrum, Retrospective),

Identifying and Analyzing the System or Program, Fast Learner with any programming language.

EDUCATIONAL ATTAINMENT

Bachelor of Science in Computer Technology

School: Eulogio Amang Rodriguez Institute of Science and Technology (EARIST)

Address: Sampaloc, Manila

School Year: 2013-2017
